Subject: microsoft settlement

We need to thank Bill Gates and Microsoft for what they have done for this country and technology instead of suing him. Where would we be without Microsoft and computers?

We live in America to have the freedom to innovate and make discoveries that will benefit Americans. One of our freedoms is capitalism.

When a man and his company is successful, do we then sue him and try to take his rights away as an American.

We need to end these lawsuits now and give Microsoft the freedom it deserves to invent new products that help us all in business and in schools.
